Sacramento County Receives National Award for Polling Place Locator Mobile App

Election Center recognizes use of technology to improve voter services

Sacramento, CA – The Election Center has recognized Sacramento County for its Polling Place Locator mobile application and companion mobile website. The mobile app, developed in-house for Android smartphones, allows the voter to enter their current address location, and utilizing GPS technology, is given all polling place locations within a two mile radius. The Eagles Award for outstanding use of technology was presented to Nick Graf, information technology analyst with the Sacramento County Elections Office at the Center’s 28th annual conference in Boston, MA on Thursday.

“With the Presidential election cycle in full swing, jurisdictions still took time to submit and share their best practices. This shows pride in our profession and demonstrates a commitment to excellence that sets the standard for all of us to follow,” said Dawn Williams, Marshall County Auditor and Recorder/Commissioner of Elections and Chairman of the Election Center Professional Practice Committee.

The Election Center supports the importance of professional development for election officials across the country. Its members are government employees whose profession is to serve in voter registration and elections administration. The Election Center, also known as the National Association of Election Officials, is a nonprofit 501(c)(3) tax-exempt organization under the regulations of the Internal Revenue Service.
